

In Fiscal Year 2011<sup>1</sup>, the state of Kentucky received:

- Personal Responsibility Education Program funds totaling \$702,324
  - Title V Abstinence Education Program funds totaling \$835,884

In Fiscal Year 2011, local entities in Kentucky received:

Teen Pregnancy Prevention Initiative funds totaling \$963,330

#### SEXUALITY EDUCATION LAW AND POLICY

There is no state law in Kentucky regarding sex education, however, all Kentucky schools follow the department of education's *Program of Studies*, required instruction for students in grades six through 12. Through personal and physical health education, students learn "how decision-making relates to responsible sexual behavior (e.g., abstinence, preventing pregnancy, preventing HIV/STDs), and impacts the physical, mental and social well being of an individual." Students also learn about the basic reproductive system and functions. No specific curriculum is required. However, state funds are available for local health departments to help young people postpone sexual involvement.

Kentucky does not require parental permission for students to participate in sexuality or HIV/AIDS education, nor does it say whether parents or guardians may remove their children from such classes.

See Kentucky Department of Education's *Program of Studies*.

#### RECENT LEGISLATION

Bill to Require Parental Consent

House Bill 434, introduced in February 2012, amends current policy by requiring that schools develop and implement methods to notify parents if sexual education will be taught and requires their consent to participate in such instruction. It also requires notification of and permission to receive contraceptives, if contraceptives will be made available to students. The bill was assigned to the House Committee on Education and is currently pending.

#### YOUTH SEXUAL HEALTH DATA

SIECUS has compiled the following data to provide an overview of adolescent sexual health in Kentucky. The data collected represents the most current information available.

## Kentucky Youth Risk Behavior Survey (YRBS) Data<sup>3</sup>

- In 2011, 52% of female high school students and 52% of male high school students in Kentucky reported ever having had sexual intercourse, compared to 46% of female high school students and 49% of male high school students nationwide.
- In 2011, 6% of female high school students and 9% of male high school students in Kentucky reported having had sexual intercourse before age 13, compared to 3% of female high school students and 9% of male high school students nationwide.
- In 2011, 16% of female high school students and 17% of male high school students in Kentucky reported having had four or more lifetime sexual partners, compared to 13% of female high school students and 18% of male high school students nationwide.
- In 2011, 41% of female high school students and 35% of male high school students in Kentucky reported being currently sexually active (defined as having had sexual intercourse in the three months prior to the survey), compared to 34% of female high school students and 33% of male high school students nationwide.
- In 2011, among those high school students who reported being currently sexually active, 46% of females and 56% of males in Kentucky reported having used condoms the last time they had sexual intercourse, compared to 54% of females and 67% of males nationwide.
- In 2011, among those high school students who reported being currently sexually active, 27% of females and 14% of males in Kentucky reported having used birth control pills the last time they had sexual intercourse, compared to 23% of females and 13% of males nationwide.
- In 2011, among those high school students who reported being currently sexually active, 12% of females and 22% of males in Kentucky reported having used alcohol or drugs the last time they had sexual intercourse, compared to 18% of females and 26% of males nationwide.
- In 2011, 84% of high school students in Kentucky reported having been taught about AIDS/HIV in school, compared to 84% of high school students nationwide.

# Kentucky Teen Pregnancy, HIV/AIDS, and Sexually Transmitted Disease Data Teen Pregnancy, Birth, and Abortion

- Kentucky's teen birth rate currently ranks seventh in the United States, with a rate of 46.2 births per 1,000 young women ages 15–19, compared to the national rate of 34.3 births per 1,000.<sup>4</sup> In 2010, there were a total of 6,689 live births reported to young women ages 15–19 in Kentucky.<sup>5</sup>
- In 2005, Kentucky's teen pregnancy rate ranked 22nd in the United States, with a rate of 66 pregnancies per 1,000 young women ages 15–19, compared to the national rate of 70 pregnancies per 1,000. There were a total of 9,030 pregnancies among young women ages 15–19 reported in Kentucky in 2005.

• In 2005, Kentucky's teen abortion rate ranked 48th in the United States, with a rate of six abortions per 1,000 young women ages 15–19, compared to the national rate of 19 abortions per 1,000.8

#### HIV and AIDS

- In 2010, the rate of diagnoses of HIV infection among adolescents aged 13-19 years in Kentucky was 4.3 per 100,000 compared to the national rate of 7.9 per 100,000.
- In 2010, the rate of AIDS diagnoses among adolescents 13-19 years in Kentucky was 0.6 per 100,000 compared to the national rate of 1.9 per 100,000. 10
- In 2010, the rate of diagnoses of HIV infection among young adults aged 20-24 years in Kentucky was 26.7 per 100,000 compared to the national rate of 36.9 per 100,000.
- In 2010, the rate of AIDS diagnoses among young adults aged 20-24 years in Kentucky was 10.2 per 100,000 compared to the national rate of 10.4 per 100,000. 12

#### Sexually Transmitted Diseases

- Kentucky ranks 29th in reported cases of chlamydia among young people ages 15–19 in the
  United States, with an infection rate of 16.65 cases per 1,000, compared to the national rate of
  20.03 cases per 1,000. In 2009, there were a total of 4,826 cases of chlamydia reported among
  young people ages 15–19 in Kentucky.<sup>13</sup>
- Kentucky ranks 22nd in reported cases of gonorrhea among young people ages 15–19 in the
  United States, with an infection rate of 3.7 cases per 1,000, compared to the national rate of 4.04
  cases per 1,000. In 2009, there were a total of 1,073 cases of gonorrhea reported among young
  people ages 15–19 in Kentucky.<sup>14</sup>
- Kentucky ranks 13th in reported cases of primary and secondary syphilis among young people ages 15–19 in the United States, with an infection rate of 0.02 per cases 1,000, compared to the national rate of 0.05 cases per 1,000. In 2009, there were a total of seven cases of syphilis reported among young people ages 15–19 in Kentucky.<sup>15</sup>

# FEDERAL FUNDING FOR SEX EDUCATION, TEEN PREGNANCY PREVENTION, AND ABSTINENCE-ONLY PROGRAMS

## President's Teen Pregnancy Prevention Initiative

The President's Teen Pregnancy Prevention Initiative (TPPI) funds medically accurate and age-appropriate programs to reduce teen pregnancy. The U.S. Department of Health and Human Services, Office of Adolescent Health (OAH) administers the grant program, which totaled \$105 million in discretionary funding for Fiscal Year (FY) 2011. TPPI consists of two funding tiers that provide grants to local public and private entities. Tier 1 totals \$75 million and provides funding for the replication of evidence-based programs proven to prevent unintended teen pregnancy and address underlying behavioral risk factors. Tier 2 totals \$25 million and provides funding to develop and test additional models and innovative strategies. A portion of the Tier 2 funds, \$15.2 million, was allocated for research and demonstration grants to test innovative approaches, while the remaining funding, \$9.8 million, was

allocated for grants to support communitywide initiatives. TPPI also dedicates \$4.5 million in funding to conduct evaluations of individual programs.

## TPPI Tier 1: Evidence-Based Programs

The TPPI Tier 1 grant program supports the replication of evidence-based programs proven effective through rigorous evaluation to prevent unintended teen pregnancy, underlying behavioral risk factors, or other associated risk factors.

• There are no TPPI Tier 1 grantees in Kentucky.

## TPPI Tier 2: Innovative Approaches

The TPPI Tier 2 grant program supports research and demonstration programs in order to develop, replicate, refine, and test additional models and innovative strategies for preventing teenage pregnancy.

• There is one TPPI Tier 2 Innovative Approaches grantee in Kentucky, University of Louisville Research Foundation, Inc., which received \$963,330 for FY 2011.

## University of Louisville Research Foundation, Inc., \$963,330 (FY 2011)

The University of Louisville Research Foundation, Inc., utilizes its Tier 2 grant to implement and test a combined adaptation of *Reducing the Risk: Building Skills to Prevent Pregnancy, STD and HIV* and *Love Notes*. The program targets at-risk youth ages 14–19, such as immigrants, refugees, youth in foster care, youth from low-income neighborhoods, and youth from areas with high rates of teen pregnancy. The program serves approximately 360 young people each year.

Reducing the Risk is an evidence-based, pregnancy-, STD-, and HIV-prevention curriculum designed for classroom use with students in the ninth and 10th grades. It is appropriate for use with multiethnic populations. Reducing the Risk aims to reduce high-risk behaviors among participants and emphasizes strategies for abstaining from sex or practicing safer sex. The 16-lesson curriculum addresses both abstinence and contraception use and includes experiential activities that teach students to develop refusal, negotiation, and communication skills. An evaluation of the program published in Family Planning Perspectives found that it increased parent-child communication, especially among Latino youth, delayed the initiation of sexual intercourse, and reduced incidence of unprotected sex among lower-risk youth who participated in the program.<sup>17</sup>

Love Notes is a research-based curriculum for at-risk young people ages 16–24, including those who are pregnant or parenting. It "encourages youth to cultivate a vision for good love and builds the base of knowledge and skills necessary to form and maintain healthy relationships." Love Notes consists of 15 lessons that focus on communication skills and healthy relationship development.

TPPI Tier 2: Integrating Services, Programs, and Strategies through Communitywide Initiatives

The TPPI Tier 2 grant program also supports communitywide initiatives to reduce rates of teenage pregnancy and births in communities with the highest rates. The program awards grants to national organizations as well as state- and community-based organizations. Funded national partners provide training and technical assistance to local grantees. The Centers for Disease Control and Prevention (CDC) administer the grant program in partnership with OAH.

• There are no TPPI Tier 2 Communitywide Initiatives grantees in Kentucky.

#### Personal Responsibility Education Program

The Personal Responsibility Education Program (PREP) totals \$75 million per year for FYs 2010–2014 and is the first-ever dedicated funding stream for more comprehensive approaches to sexuality education.

The U.S. Department of Health and Human Services, Administration for Children and Families (ACF) administers the grant. PREP includes a \$55 million state-grant program, \$10 million to fund local entities through the Personal Responsibility Education Innovative Strategies (PREIS) Program, \$3.5 million for the Tribal PREP Program for tribes and tribal organizations, and \$6.5 million for evaluation, training, and technical assistance. Details on the state-grant program, PREIS, and Tribal PREP are included below.

## PREP State-Grant Program

The PREP state-grant program supports evidence-based programs that provide young people with medically accurate and age-appropriate information for the prevention of unintended pregnancy, HIV/AIDS, and other sexually transmitted infections (STIs). The grant program totals \$55 million per year and allocates funding to individual states. The grant does not require states to provide matching funds. Funded programs must discuss abstinence and contraception, and place substantial emphasis on both. Programs must also address at least three of the following adulthood preparation subjects: healthy relationships, positive adolescent development, financial literacy, parent-child communication skills, education and employment skills, and healthy life skills.

- The Kentucky Cabinet for Health and Families received \$702,324 in federal PREP funds for Fiscal Year 2011.
- The agency provides sub-grants to 21<sup>19</sup> local public and private entities.<sup>20</sup>

The Kentucky PREP state-grant program awards funding to local and county health departments and community-based organizations to implement evidence-based programs in public schools. Programming serves youth ages 12–18. A total of 21 local public and private entities were awarded funding to deliver programming to a total of 47 counties across the state. Community-based organizations that were awarded funds must partner with their local health department for implementation purposes. Subgrantees are required to implement *Teen Outreach Program (TOP)* or *Reducing the Risk*, which is recommended specifically for use with high school students. (Please see the information above on the University of Louisville Research Foundation, Inc., for information on *Reducing the Risk.*)<sup>21</sup>

TOP is an evidence-based youth development program that engages young people in experiential learning activities in order to "prepare for successful adulthood and avoid problem behaviors." The program is designed for youth ages 12–17 and focuses on reducing rates of school failure, school suspension, and teen pregnancy. TOP consists of a nine-month curriculum that addresses such topics as relationships, peer pressure, decision making, values clarification, goal-setting, adolescent development, and sexual health. It also includes a 20-hour community service component that engages participants in activities to enhance knowledge and develop skills, including self-efficacy, communication, conflict-management, and self-regulation. TOP can be delivered as an in-school, after-school, or community-based program. An evaluation of the program published in *Child Development* found that young women ages 15–19 who participated in TOP were significantly less likely to report a pregnancy during the program than participants in the control group. It is a pregnancy during the program than participants in the control group.

### Personal Responsibility Education Innovative Strategies (PREIS)

PREIS supports research and demonstration programs to develop, replicate, refine, and test innovative models for preventing unintended teen pregnancy. ACF administers the grant program in collaboration with OAH and provides a total of \$10 million in funding directly to local public and private entities.

• There are no PREIS grantees in Kentucky.

Tribal Personal Responsibility Education Program (Tribal PREP)

Tribal PREP supports the development and implementation of comprehensive teen pregnancy prevention programs within tribes and tribal communities. Tribal PREP programs target youth ages 10–19 who are in or are aging out of foster care, homeless youth, youth with HIV/AIDS, pregnant and/or parenting youth who are under 21 years of age, and youth who live in areas with high adolescent birth rates. Programs must address at least three of the following adulthood preparation subjects: healthy relationships, positive adolescent development, financial literacy, parent-child communication skills, education and employment skills, and healthy life skills.

- In FY 2011, 16 tribes and tribal organizations from nine states received a total of \$6.5 million.
- There are no Tribal PREP grantees in Kentucky.

## Title V State Abstinence Education Grant Program

The Title V State Abstinence Education Grant Program (Title V Abstinence-Only Program) allocates \$50 million per year to states for FYs 2010–2014. ACF administers the grant program. The Title V Abstinence-Only Program requires states to provide three state-raised dollars or the equivalent in services for every four federal dollars received. The state match may be provided in part or in full by local groups. All programs funded by the Title V Abstinence-Only Program must promote abstinence from sexual activity as their exclusive purpose and may provide mentoring, counseling, and adult supervision toward this end. Programs must be medically accurate and age-appropriate and must ensure abstinence is an expected outcome.

- The Kentucky Cabinet for Health and Family Services—Department for Public Health received \$835,884 in federal Title V abstinence-only funding for FY 2011.
- The agency provides sub-grants to 29<sup>25</sup> local public and private entities.<sup>26</sup>
- In Kentucky, the match is provided through a combination of in-kind funds from sub-grantees and the Department for Public Health/Division of Women's Health and state general funds.

The Kentucky Title V Abstinence-Only Program awards funding to local and county health departments and community-based organizations to provide abstinence-only programs in public schools to students in grades six through eight. A total of 29 local public and private entities implement abstinence-only programs in schools statewide. Sub-grantees must implement *Choosing the Best* curricula or *Postponing Sexual Involvement*.<sup>27</sup>

The Choosing the Best series is one of the more popular abstinence-only-until-marriage programs in the country. The series is comprised of a number of curricula for students from sixth grade through high school: Choosing the Best WAY (sixth grade), Choosing the Best PATH (seventh grade), Choosing the Best LIFE (eighth grade), Choosing the Best JOURNEY (ninth and 10th grades), and Choosing the Best SOULMATE (11th and 12th grades). The series has been recently revised and the information about STDs is now medically accurate. However, Choosing the Best curricula continue to promote heterosexual marriage, rely on messages of fear and shame, and include biases about gender, sexual orientation, and pregnancy options. For example, Choosing the Best PATH asks students to brainstorm the "emotional consequences" of premarital sex. Suggested answers include "guilt, feeling scared, ruined relationships, broken emotional bonds."<sup>28</sup>

Postponing Sexual Involvement is a sexuality education curriculum designed for students in grades seven and eight that is intended to help students delay sexual activity. The curriculum addresses four main topic areas: sexual abstinence, life skills, human sexuality, and contraception. Postponing Sexual Involvement emphasizes that abstinence is the best way to avoid unintended pregnancy and STDs and also teaches participants that young adolescents are not yet mature enough to manage the consequences of sexual

activity. The curriculum includes five sessions that each last between 45 and 60 minutes and focus on equipping youth with the skills to resist peer pressure to engage in sexual activity. The lessons include experiential activities and skill-building exercises to teach students decision-making, goal-setting, refusal, and negotiation skills. Lessons also cover human growth and development, the effectiveness of different contraception methods, and developing healthy sexual attitudes and values. *Postponing Sexual Involvement* is appropriate for use in school-based settings and can be implemented by teachers or by high school students trained peer instructors. Some evaluations of the program have shown positive results in the program's ability to help students delay sexual initiation; however, the results have shown varying degrees of effectiveness among male and female students, and no long-term effect in delaying sexual activity.<sup>29</sup>

#### COMPREHENSIVE APPROACHES TO SEXUALITY EDUCATION

SIECUS is not aware of any examples of model programs, policies, or best practices being implemented in Kentucky public schools that provide a more comprehensive approach to sex education for young people.

We encourage you to submit any updated or additional information on comprehensive approaches to sex education being implemented in Kentucky public schools for inclusion in future publications of the State Profiles. Please visit SIECUS' "Contact Us" webpage at <a href="https://www.siecus.org">www.siecus.org</a> to share information. Select "state policy" as the subject heading.
