

MAINE

In Fiscal Year 2013,¹ the state of Maine received:

- Division of Adolescent and School Health funds totaling \$65,000
- Personal Responsibility Education Program funds totaling \$250,000

SEXUALITY EDUCATION LAW AND POLICY

Maine's sexuality education law mandates that the state's Department of Health and Human Services "undertake initiatives to implement effective, comprehensive family life education services." The state must provide:

- training for teachers, parents, and community members;
- forums among young people and community members in communities with a high need for sexuality education;
- staff to provide trainings, develop curricula, and evaluate the program;
- funding for issue management and policy development training for school boards, superintendents, principals, and administrators; and
- funding for programs that have shown outstanding work around sexuality education.³

"Comprehensive family life education" must be taught in kindergarten through 12th grade. The information provided must be medically accurate and age-appropriate, and must respect community values and encourage parent-child communication. Programs must teach about abstinence, healthy relationships, contraception, and conflict resolution. No specific curriculum is mandated.

Parents or guardians may remove their children from sexuality education and/or sexually transmitted diseases (STDs)/HIV education classes. This is referred to as an "opt-out" policy.

See Maine Revised Statutes Annotated Title 22, §§ 1902, 1910, and 1911.

2013 STATE LEGISLATIVE SESSION ACTIVITY

SIECUS is not aware of any proposed legislation regarding sexuality education in Maine.

YOUTH SEXUAL HEALTH DATA

SIECUS has compiled the following data to provide an overview of adolescent sexual health in Maine. The data collected represents the most current information available.

Maine Youth Risk Behavior Survey (YRBS) Data⁴

- In 2013, 43.8% of female high school students and 41.2% of male high school students in Maine reported ever having had sexual intercourse, compared to 46% of female high school students and 47.5% of male high school students nationwide.
- In 2013, 2.2% of female high school students and 4.3% of male high school students in Maine reported having had sexual intercourse before age 13, compared to 3.1% of female high school students and 8.3% of male high school students nationwide.
- In 2012, 34.0% of female high school students and 27.7% of male high school students in Maine reported being currently sexually active (defined as having had sexual intercourse in the three months prior to the survey), compared to 35.2% of female high school students and 32.7% of male high school students nationwide.
- In 2013, 11.1% of female high school students and 6.8% of male high school students in Maine who dated or went out with someone during the 12 months before the survey reported experiencing physical dating violence one or more times during that time period (defined as being hit, slammed into something, or injured with an object or weapon on purpose by someone they were dating or going out with), compared to 13% of female high school students and 7.4% of male high-school students nationwide.

Visit the Centers for Disease Control and Prevention's <u>Youth Online database</u> for additional information on sexual behaviors.

Maine Teen Pregnancy, HIV/AIDS, and Other STD Data

Teen Pregnancy, Birth, and Abortion

- In 2010, Maine's teen pregnancy rate ranked 46th in the United States, with a rate of 37 pregnancies per 1,000 young women ages 15–19, compared to the national rate of 57 per 1,000.⁵ There were a total of 1,560 pregnancies among young women ages 15–19 reported in Maine.⁶
- In 2012, Maine's teen birth rate ranked 45th in the United States, with a rate of 19.4 births per 1,000 young women ages 15–19, compared to the national rate of 29.4 per 1,000.⁷ In 2012, there were a total of 798 live births to young women ages 15–19 reported in Maine.⁸
- In 2010, Maine's teen abortion rate ranked 26th in the United States, with a rate of 10 abortions per 1,000 young women ages 15–19, compared to the national rate of 15 per 1,000. There were a total of 420 abortions among young women ages 15–19 reported in Maine in 2010. The state of 10 abortions among young women ages 15–19 reported in Maine in 2010.

HIV and AIDS

- In 2011, the rate of diagnoses of HIV infection among adolescents ages 13–19 in Maine was 0 per 100,000, compared to the national rate of 7.6 per 100,000.¹¹
- In 2011, the rate of AIDS diagnoses among adolescents ages 13–19 in Maine was 0 per 100,000, compared to the national rate of 1.9 per 100,000.¹²

- In 2011, the rate of diagnoses of HIV infection among young adults ages 20–24 in Maine was 7.0 per 100,000, compared to the national rate of 36.3 per 100,000.
- In 2011, the rate of AIDS diagnoses among young adults ages 20–24 years in Maine was 1.3 per 100,000, compared to the national rate of 10.9 per 100,000.¹⁴

Sexually Transmitted Diseases

- In 2012, Maine ranked 47th in the United States for reported cases of chlamydia among young people ages 15–19, with an infection rate of 1,164.5 cases per 100,000, compared to the national rate of 2,001.7 per 100,000. In 2012, there were a total of 1,003 cases of chlamydia among young people ages 15–19 reported in Maine.¹⁵
- In 2012, Maine ranked 45th in the United States for reported cases of gonorrhea among young people ages 15–19, with an infection rate of 53.4 cases per 100,000, compared to the national rate of 376.8 per 100,000. In 2012, there were a total of 46 cases of gonorrhea among young people ages 15–19 reported in Maine. 16
- In 2012, Maine ranked 28th in the United States for reported cases of primary and secondary syphilis among young people ages 15–19, with an infection rate of 2.3 cases per 100,000, compared to the national rate of 4.1 per 100,000. In 2012, there were a total of two cases of syphilis among young people ages 15–19 reported in Maine.¹⁷

FEDERAL FUNDING FOR SEX EDUCATION, TEEN PREGNANCY PREVENTION, AND ABSTINENCE-ONLY-UNTIL-MARRIAGE PROGRAMS

President's Teen Pregnancy Prevention Initiative

The President's Teen Pregnancy Prevention Initiative (TPPI) funds medically accurate and age-appropriate programs to reduce teen pregnancy. The U.S. Department of Health and Human Services, Office of Adolescent Health (OAH) administers the grant program, which totaled \$105 million in discretionary funding for FY 2013. TPPI consists of two funding tiers that provide grants to local public and private entities. Tier 1 totals \$75 million and provides funding for the replication of evidence-based programs proven to prevent unintended teen pregnancy and address underlying behavioral risk factors. Tier 2 totals \$25 million and provides funding to develop and test additional models and innovative strategies. A portion of the Tier 2 funds, \$15.2 million, was allocated for research and demonstration grants to test innovative approaches, while the remaining funding, \$9.8 million, was allocated for grants to support communitywide initiatives. OAH utilizes the remaining appropriated funds to provide program support, implementation evaluation, and technical assistance to grantees. TPPI also dedicates \$8.5 million in funding to conduct evaluations of individual programs.

TPPI Tier 1: Evidence-Based Programs

The TPPI Tier 1 grant program supports the replication of evidence-based programs proven effective through rigorous evaluation to prevent unintended teen pregnancy and minimize underlying behavioral risk factors or other associated risk factors.

• There are no TPPI Tier 1 grantees in Maine.

TPPI Tier 2: Innovative Approaches

The TPPI Tier 2 grant program supports research and demonstration programs in order to develop, replicate, refine, and test additional models and innovative strategies for preventing teenage pregnancy.

• There are no TPPI Tier 2 Innovative Approaches grantees in Maine.

TPPI Tier 2: Communitywide Initiatives

The TPPI Tier 2 grant program also supports communitywide initiatives to reduce rates of teenage pregnancy and births in communities with the highest rates. The program awards grants to national organizations as well as state-and community-based organizations. Funded national partners provide training and technical assistance to local grantees. The Centers for Disease Control and Prevention (CDC) administer the grant program in partnership with OAH.

• There are no TPPI Tier 2 Communitywide Initiatives grantees in Maine.

Division of Adolescent and School Health

The Division of Adolescent and School Health (DASH), within the Centers for Disease Control and Prevention (CDC), provides funding to 17 state and 19 local education agencies to help districts and schools strengthen student health through exemplary sexual health education (ESHE), that emphasizes HIV and other STD prevention, increased access to key sexual health services (SHS), and the establishment of safe and supportive environments (SSE) for students and staff. In addition, DASH funds nine national nongovernmental organizations (NGOs) to help state and local education agencies achieve these goals.

• There were no DASH grantees in Maine funded to strengthen student health through ESHE, SHS, and SSE in FY 2013.

DASH also funds three local education agencies and one NGO to implement multiple program activities to meet the HIV/STD-prevention needs of young men who have sex with men (YMSM) and to develop strategic partnerships and collaborations between schools and community-based, mental health, and social services organizations to accomplish this work.

• There were no DASH grantees in Maine funded to deliver YMSM programming in FY 2013.

DASH also provides funding for state, territorial, and local education agencies and state health agencies to establish and strengthen systematic procedures to collect and report Youth Risk Behavior Survey (YRBS) and School Health Profiles data for policy and program improvements.

• There was one DASH grantee in Maine funded to collect and report YRBS and School Health Profiles data in FY 2013, the Maine Department of Education (\$65,000).

Pregnancy Assistance Fund

The Pregnancy Assistance Fund (PAF), administered by OAH, provides expecting and parenting teens, women, fathers, and their families with a network of support services. Established in FY 2010 through a 10-year authorization (FY 2010–FY 2019) in the Affordable Care Act (ACA), PAF is a \$25 million competitive grant program for state and tribal entities. PAF grants support programs that include at least one of the following four components: 1) support for expectant and parenting student services at institutions of higher education; 2) support for expectant and parenting teens, women, fathers, and their families at high schools and community centers; 3) improved services for pregnant women who are victims of domestic violence, sexual violence, sexual assault, and stalking; and 4) increased public awareness and education services for expectant and parenting teens, women, fathers, and their families. Now in the second round of awards, PAF supports 17 entities in 14 states and three tribal entities, most of which focus their efforts on serving teen parents.

• There are no PAF grantees in Maine.

Personal Responsibility Education Program

The Personal Responsibility Education Program (PREP) totals \$75 million per year for FYs 2010–2014 and is the first-ever dedicated funding stream for more comprehensive approaches to sexuality education. The U.S. Department of Health and Human Services, Administration for Children and Families (ACF) administers the grant. PREP includes a \$55 million state grant program, \$10 million to fund local entities through the Personal Responsibility Education Innovative Strategies (PREIS) program, \$3.1 million for Tribal PREP, for tribes and tribal organizations, with remaining funds for evaluation, training, and technical assistance. In addition, provisions within the statute for PREP enable a competitive application process for community- and faith-based organizations within states and territories that do not directly seek PREP funding by the third year of the program; these competitive PREP (CPREP) grants were awarded to organizations in five states and three territories in FY 2013. Details on the state grant program, PREIS, Tribal PREP, and CPREP are included below.

PREP State-Grant Program

The PREP state-grant program supports evidence-based programs that provide young people with medically accurate and age-appropriate information for the prevention of unintended pregnancy, HIV/AIDS, and other STDs. The grant program totals \$55 million per year and allocates funding to individual states. The grant does not require states to provide matching funds. Funded programs must discuss abstinence and contraception, and place substantial emphasis on both. Programs must also address at least three of the following adulthood preparation topics: healthy relationships, positive adolescent development, financial literacy, parent-child communication skills, education and employment skills, and healthy life skills.

- The Maine Center for Disease Control and Prevention received \$250,000 in federal PREP funds for FY 2013.
- The state agency sub-grants the funds to Maine Family Planning (\$239,476), which subcontracts to Jobs for Maine's Graduates (\$140,000).¹⁸

The Maine Center for Disease Control and Prevention administers the PREP state-grant program in collaboration with Maine Family Planning and Jobs for Maine Graduates. Maine Family Planning provides oversight, training, technical assistance, fidelity monitoring, evaluation, and materials to Jobs for Maine Graduates, which implements the programming to high school students in alternative school settings. Programming serves juniors and seniors at the following high schools: Belfast, Carrabec, Half-Dale, Houlton, Madison, Mt. Ararat, Oceanside, Old Town, Penquis Valley, Portland, Sanford, Shead, and Skowhegan. The sub-grantees use the *All4You!* curriculum to address the topics of healthy relationships, healthy life skills, and adolescent development and thus meet the adult preparation requirement of the grant.¹⁹

Personal Responsibility Education Innovative Strategies (PREIS)

PREIS supports research and demonstration programs to develop, replicate, refine, and test innovative models for preventing unintended teen pregnancy. ACF administers the grant program in collaboration with OAH and provides a total of \$10 million in funding directly to local public and private entities.

• There are no PREIS grantees in Maine.

Tribal Personal Responsibility Education Program (Tribal PREP)

Tribal PREP supports the development and implementation of comprehensive teen pregnancy prevention programs within tribes and tribal communities. Tribal PREP programs target youth ages 10–19 who are in or are aging out of foster care, homeless youth, youth with HIV/AIDS, pregnant and/or parenting youth who are under 21 years of age, and youth who live in areas with high adolescent birth rates. Programs must address at least three of the following adulthood preparation subjects: healthy relationships, positive adolescent development, financial literacy, parent-child communication skills, education and employment skills, and healthy life skills.

- In FY 2013, 16 tribes and tribal organizations from nine states received a total of \$3.1 million.
- There are no Tribal PREP grantees in Maine.

Competitive Personal Responsibility Education Program (CPREP)

CPREP grants support evidence-based programs that provide young people with medically accurate and age-appropriate information for the prevention of unintended pregnancy, HIV/AIDS, and other STDs. Organizations and institutions in states and territories that did not apply for PREP formula grants in either of the past two fiscal years were eligible to submit competitive applications for CPREP grants. Thirty-seven grants, totaling \$18.6 million, were awarded in FY 2013 to organizations in American Samoa, the Commonwealth of Northern Mariana Islands, Florida, Guam, Indiana, North Dakota, Texas, and Virginia.

• There are no CPREP grantees in Maine.

Title V State Abstinence Education Grant Program

The Title V abstinence-only-until-marriage (Title V AOUM) program, administered by ACF, allocates \$50 million per year for FYs 2010–2014. The Title V AOUM program requires states to provide three state-raised dollars or the equivalent in services for every four federal dollars received. The state match may be provided in part or in full by local groups. All programs funded by the Title V AOUM program must promote abstinence from sexual activity as their exclusive purpose and may provide mentoring, counseling, and adult supervision toward this end. Programs must be medically accurate and age-appropriate and must ensure abstinence is an expected outcome.

• Maine chose not to apply for Title V AOUM funding for FY 2013.

Competitive Abstinence Education Grant Program

Administered by the ACF, the CAE grant program provides grants for "abstinence education" as defined by the A–H statute in Title V of the Social Security Act, as well as for mentoring, counseling, and adult supervision that promotes abstinence outside of marriage. As currently implemented by ACF, the programs must also be medically accurate. In FY 2013, \$4.3 million was granted through a competitive application process to 10 grantees across nine states, in addition to the nine grantees implementing the second year of their CAE awards in some overlapping and additional states, for a total of 19 CAE grantees in 14 states.

• There are no CAE grantees in Maine.

Maine TPPI, DASH, PAF, PREP, Title V AOUM, and CAE Funding in FY 2013

Grantee Grantee	Award	Fiscal Years
Division of Adolescent and School Health (DASH)
