

Indiana Sexuality Education Law and Policy

Indiana requires that schools provide instruction on HIV/AIDS, and "integrate this effort to the extent possible with instruction on other dangerous communicable diseases."¹ The law states that the Department of Education must work with the Department of Health to develop HIV/AIDS-prevention educational materials and make them available to school districts. These materials must "stress the moral aspects of abstinence from sexual activity" and "state that the best way to avoid AIDS is for young people to refrain from sexual activity until they are ready as adults to establish, in the context of marriage, a mutually faithful monogamous relationship."2

State law also mandates that local school boards establish an AIDS Advisory Council, consisting of 13 "parents, students, teachers, administrators, and representatives of the state department of health." The council must review all curricula and materials for HIV/AIDS instruction to ensure that they "are based on sound medical principles and reflect the attitude of the community," recommend the content of HIV/AIDS instruction, and ensure that it is age-appropriate.³

Schools are permitted to offer additional sexuality education instruction, which must meet the following criteria:

- teach abstinence from sexual activity outside of marriage as the expected standard for all school age children:
- include in the instruction that abstinence from sexual activity is the only certain way to avoid outof-wedlock pregnancy, sexually transmitted diseases [STDs], and other associated health problems; and
- include in the instruction that the best way to avoid sexually transmitted diseases and other associated health problems is to establish a mutually faithful monogamous relationship in the context of marriage.⁴

Indiana does not require parental permission for students to participate in sexuality or HIV/AIDS education, nor does it state whether parents or guardians may remove their children from such classes.

See Indiana Code 20-30-5-12, 20-30-5-13, 20-34-1-3, 20-34-1-13, and 20-34-3-17.

Recent Legislation

Bill to Allow Opt-Out from Abstinence-Only-Until-Marriage Classes

Senate Bill 258 and House Bill 1317, introduced in January 2009, would have required school principals to notify parents that their child does not receive instruction on preventing STDs, HIV/AIDS, and pregnancy if that child participates in an abstinence-only-until-marriage program. The notice to parents would have stated that such programs do not provide medically accurate

information on the risks, benefits, or proper use of methods approved by the Food and Drug Administration for reducing the risk of contracting or transmitting STDs, including HIV/AIDS, or pregnancy. It would have also allowed a parent to have their child excused from abstinence-only courses. The bill included an appeals process for a parent who did not receive notice of his/her right to address the governing body concerning curriculum. The bill was referred to the Committee on Education and Career Development, where it died.

Bill to Require Medical Accuracy

Senate Bill 566, introduced in January 2009, would have required instruction about human sexuality or STDs in public schools and accredited nonpublic schools to be based on information that is factual, medically accurate, and age-appropriate. This instruction would have had to be suitable for all students, regardless of race, ethnicity, gender, sexual orientation, cultural background, or disability; and would encourage students to discuss sexuality with their parents. The bill died after being referred to the Committee on Education and Career Development.

Indiana's Youth: Statistical Information of Note⁵

- In 2009, 53% of female high school students and 46% of male high school students in Indiana reported ever having had sexual intercourse compared to 46% of female high school students and 46% of male high school students nationwide.
- In 2009, 3% of female high school students and 6% of male high school students in Indiana reported having had sexual intercourse before age 13 compared to 3% of female high school students and 8% of male high school students nationwide.
- In 2009, 14% of female high school students and 14% of male high school students in Indiana reported having had four or more lifetime sexual partners compared to 11% of female high school students and 16% of male high school students nationwide.
- In 2009, 41% of female high school students and 32% of male high school students in Indiana reported being currently sexually active (defined as having had sexual intercourse in the three months prior to the survey) compared to 36% of female high school students and 33% of male high school students nationwide.
- In 2009, among those high school students who reported being currently sexually active, 52% of females and 66% of males in Indiana reported having used condoms the last time they had sexual intercourse compared to 54% of females and 69% of males nationwide.
- In 2009, among those high school students who reported being currently sexually active, 27% of females and 19% of males in Indiana reported having used birth control pills the last time they had sexual intercourse compared to 23% of females and 16% of males nationwide.
- In 2009, among those high school students who reported being currently sexually active, 16% of females and 27% of males in Indiana reported having used alcohol or drugs the last time they had sexual intercourse compared to 17% of females and 26% of males nationwide.

• In 2009, 90% of high school students in Indiana reported having been taught about AIDS/HIV in school compared to 87% of high school students nationwide.

Indiana Youth Sexual Health Statistics

Teen Pregnancy, Birth, and Abortion

- Indiana's teen pregnancy rate ranks 27th in the U.S., with a rate of 62 pregnancies per 1,000 young women ages 15–19 compared to the national rate of 70 pregnancies per 1,000.⁶ There were a total of 13,740 pregnancies among young women ages 15–19 reported in 2005, the most recent year for which data are available, in Indiana.⁷
- Indiana's teen birth rate ranked 18th in the U.S. in 2005, with a rate of 43.2 births per 1,000 young women ages 15–19 compared to the national rate of 40.5 births per 1,000.⁸ In 2005, there were a total of 9,508 live births reported to young women ages 15–19 in Indiana.⁹
- In 2006, the U.S. teen birth rate increased for the first time in 15 years by 3% from 40.5 to 41.9 births per 1,000 young women ages 15–19, after having steadily declined between 1991 and 2005.¹⁰ Indiana's teen birth rate also increased between 2005 and 2006, from 43.2 to 43.5 births per 1,000 young women ages 15–19.¹¹
- Indiana's teen abortion rate ranks 37th in the U.S., with a rate of 8 abortions per 1,000 young women ages 15–19 compared to the national rate of 19 abortions per 1,000. In 2005, there were a total of 1,637 abortions reported among young women ages 15–19 in Indiana.¹²

HIV and AIDS

- Indiana ranks 22nd in cases of HIV infection diagnosed in the U.S. among all age groups. In 2007, there were a total of 313 new cases of HIV infection diagnosed in Indiana.¹³
- Indiana ranks 16th in cases of HIV/AIDS diagnosed among young people ages 13–19 out of the 34 states with confidential, name-based HIV infection reporting. In 2007, there were a total of 29 young people ages 13–19 diagnosed with HIV/AIDS in Indiana.¹⁴
- Indiana's AIDS rate ranks 35th in the U.S., with a rate of 5.2 cases per 100,000 population compared to the national rate of 12.5 cases per 100,000.¹⁵
- Indiana ranks 27th in number of reported AIDS cases in the U.S. among all age groups. In 2007, there were a total of 329 new AIDS cases reported in Indiana¹⁶
- Indiana ranks 29th in number of reported AIDS cases in the U.S. among young people ages 13– 19. In 2007, there were a total of 2 AIDS cases reported among young people ages 13–19 in Indiana.¹⁷

Sexually Transmitted Diseases

- Indiana ranks 29th in reported cases of Chlamydia among young people ages 15–19 in the U.S., with an infection rate of 17.56 cases per 1,000 compared to the national rate of 19.51 cases per 1,000. In 2008, there were a total of 7,946 cases of Chlamydia reported among young people ages 15–19 in Indiana.¹⁸
- Indiana ranks 18th in reported cases of gonorrhea among young people ages 15–19 in the U.S., with an infection rate of 5.29 cases per 1,000 compared to the national rate of 4.52 cases per 1,000. In 2008, there were a total of 2,396 cases of gonorrhea reported among young people ages 15–19 in Indiana.¹⁹

• Indiana ranks 23rd in reported cases of primary and secondary syphilis among young people ages 15–19 in the U.S., with an infection rate of 0.02 cases per 1,000 compared to the national rate of 0.04 cases per 1,000. In 2008, there were a total of 11 cases of syphilis reported among young people ages 15–19 in Indiana.²⁰

Comprehensive Approaches to Sex Education

SIECUS is not aware of any examples of model programs, policies, or best practices being implemented in Indiana public schools that provide a more comprehensive approach to sex education for young people.

We encourage you to submit any updated or additional information on comprehensive approaches to sex education being implemented in Indiana public schools for inclusion in future publications of the SIECUS State Profiles. Please visit SIECUS' "Contact Us" webpage at <u>www.siecus.org</u> to share information. Select "state policy" as the subject heading.

Federal Funding for Abstinence-Only-Until-Marriage Programs

The Department of Health and community-based organizations in Indiana received \$2,028,003 in federal funds for abstinence-only-until-marriage programs in Fiscal Year 2009.²¹

Title V Abstinence-Only-Until Marriage Funding

- Indiana received \$230,549 in federal Title V abstinence-only-until-marriage funding in Fiscal Year 2009. Due to the expiration of the grant program on June 30, 2009, three months prior to the end of the federal fiscal year, the state received three quarters of the total funding allocated for the full fiscal year.
- The Indiana State Department of Health distributes federal Title V abstinence-only-until-marriage funds to 14 sub-grantees, including six community-based organizations, three hospitals, two school districts, one crisis pregnancy center, one faith-based organization that operates a crisis pregnancy center, and one healthcare organization.
- The Department of Health also uses a portion of the federal funds to support a statewide media campaign, "Indiana RESPECT, (Reduces Early Sex and Pregnancy by Educating Children and Teens)" that includes television advertisements, materials, and a website with separate links for teens and parents.
- The Title V abstinence-only-until marriage grant required states to provide three state-raised dollars or the equivalent in services for every four federal dollars received. The state match could have been provided in part or in full by local groups.
- In Indiana sub-grantees contributed to the match through direct revenue.

Community-Based Abstinence Education (CBAE) Funding

- Organizations in Indiana received \$1,797,454 in CBAE funding for Fiscal Year 2009.
- There are three CBAE grantees in Indiana, including two community-based organizations and one hospital.

Adolescent Family Life Act (AFLA) Funding

• There are no AFLA grantees in Indiana.

Abstinence-Only-Until-Marriage Curricula Used by Grantees

SIECUS is not aware of any commercially available curricula used by abstinence-only-until-marriage grantees in Indiana.

To read reviews of abstinence-only-until-marriage curricula commonly used by federal grantees please visit the "Curricula and Speaker Reviews" webpage of SIECUS' Community Action Kit at <u>www.communityactionkit.org</u>.

²¹ This refers to the federal government's fiscal year, which begins on October 1st and ends on September 30th. The fiscal year is designated by the calendar year in which it ends; for example, Fiscal Year 2009 began on October 1, 2008 and ended on September 30, 2009.

²² Through the Fiscal Year 2010 appropriations process, Congress eliminated all discretionary funding for abstinence-only-untilmarriage programs, including the entire CBAE program and the abstinence-only-until-marriage portion of AFLA. The grant years listed in the chart reflect the years for which funding was originally approved; however, the grants effectively ended in Fiscal Year 2009.

²³ SIECUS has identified this person as a state-based contact for information on adolescent health and if applicable, abstinenceonly-until-marriage programs.

²⁴ This section is a list of major newspapers in your state with contact information for their newsrooms. This list is by no means exhaustive and does not contain the local level newspapers which are integral to getting your message out to your community. SIECUS strongly urges you to follow stories about the issues that concern you on the national, state, and local level by using an internet news alert service such as <u>Google alerts</u>, becoming an avid reader of your local papers, and establishing relationships with reporters who cover your issues. For more information on how to achieve your media goals visit the SIECUS <u>Community</u> <u>Action Kit</u>.
